Short range wireless DMX512 for \$1500 - Oh Wow!

NO. O-WOW

The infrared wireless DMX512 Link from **Goddard Design Co.**

Think of all the times you've wished for a simple means to transmit DMX512 for short distances in the millimeter to 10 meter range. To handle signals onto turntables, scenery units, wagons, across a crowded area where running cable is impractical. Or think of transmitting DMX512 to amusement ride vehicles easily.

The O-WOW handles one complete universe of DMX512, including systems intermingling null start code packets and alternate start code packets. The O-WOW encodes DMX512 into a proprietary error checking protocol designed for optical transmission. This data is then modulated onto infrared light. The signal is recovered, error checked, and the original DMX512 data stream is reconstructed. The system uses an encoding box, a decoding box, and separate optical sensors for transmitting and receiving. These sensors are compact and may be placed where convenient. The optical units are connected to the encoder and decoder by 4-pin cables.

- ! Encoder/decoder box size: 2.4" h, 6.6" w, 9.7" d
- ! Transmitter/receiver box size: 1.1"h, 2.6"w, 2.6" mm d
- ! High power transmitter size: 2.6" h, 4.7"w, 1.4" d
- ! Universal power - 100V to 250 V; 50 or 60 Hz
- ! Production units available - Now!.
- ! Cost of a Standard System - \$1500.00 Professional Net
A standard system includes an encoder, a high power transmitter, a receiver, and a decoder.

O-WOW
The infrared wireless DMX512 Link
Part numbers and prices

PART #	DESCRIPTION	PRICE
FD OWOW_TE	Table top encoder and power supply	\$575.00
FD IRIL	Short range infrared transmitter	\$90.00
FD IR_BRIGHT	Mid range infrared transmitter	\$180.00
FD OWOW_TD	Table top decoder and power supply	\$575.00
FD IR_RCV	Infrared receiver	\$170.00
FD OWOW_SYS	Complete mid range system	\$1500.00
